

Manual Nibblers

“Must Have” tools for vinyl fence installation

These models are used in the field for vinyl fence installation. They are invaluable time-savers when it is necessary to elongate post rail holes or rail picket holes to rack fence for a slope or grade. All feature variable leverage handle action, long aluminum handles, and replaceable cutter blades.

FASTER!

Eliminates Filing

Fence nibblers enlarge post opening 1/4" (6.35mm) depth per stroke and picket nibbler removes 1/8" (3.175mm) depth per stroke.

EASIER!

Self-Alignment

All models self-align with existing hole for ease of operation.

SAFER!

Protects Hands

Keeps hands away from working surface.

Extended Aluminum Handles

Long aluminum handles with variable leverage action minimize required hand force.

Replaceable Blade

Punch and die cutter is easily replaced if necessary after extensive use.

Precision Milled

Punch and die cutter is precision CNC milled of high quality tool steel.

Comfort Handle Grips

Textured molded handle grips prevent slippage and comfort user's hands.

VINYL FENCE POST NIBBLER MODELS

Use to elongate rail hole in post when required to rack fence rails or section over a slope or grade. Variable leverage handle action. Long aluminum handles. Replaceable cutter jaws. Clean cutting action. Self-aligning to existing post rail hole opening. (Note: Move tool side-to-side for post rail hole openings wider than nibbler.) Nibbles away 1/4" (6.35mm) depth of material per stroke.

MW-1-1/2VFRN 1-1/2" Nibbler

1-1/2" (38.1mm) cutting width per stroke

MW-1-1/2VFRNRJ Replacement Jaw for MW-1-1/2VFRN

MW-2VFRN 2" Nibbler

2" (50.8mm) cutting width per stroke

MW-2VFRNRJ Replacement Jaw for MW-2-VFRN

VINYL FENCE PICKET RAIL NIBBLER MODEL

Use to elongate picket hole in rail when required to rack picket fence over a slope or grade. Variable leverage handle action. Long aluminum handles. Replaceable cutter jaws. Clean cutting action. Self-aligning to existing picket rail hole opening. (Note: Move tool side-to-side for picket rail hole opening wider than nibbler.) Nibbles away 1/8" (3.175mm) of material per stroke.

MW-7/8VFPN 7/8" Nibbler

7/8" (22.23mm) cutting width per stroke

MW-7/8VFPNRJ Replacement Jaw for MW-7/8VFPN
