

# Low Profile Cabinet™ Screw

## Built-in Washer Head Presses Flush Against any Material

**RECESSED  
STAR DRIVE**

Zero Stripping, with 6 points of contact

**LOW PROFILE  
WASHER HEAD**

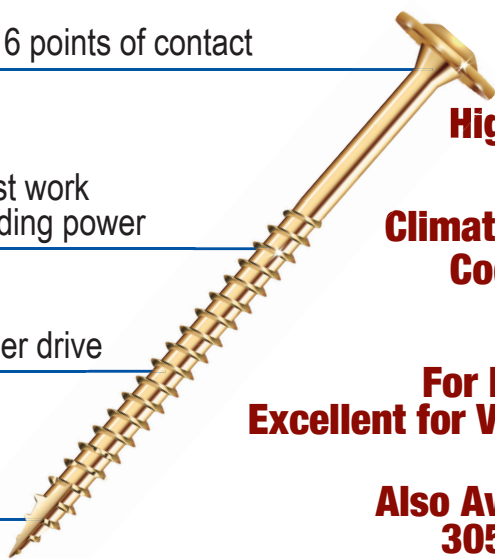

Presses flush against work surface for extra holding power

**W-CUT™**

Low torque, smoother drive

**ZIP-TIP™**

No pre-drilling, faster penetration

### ÜberGrade™

**Case Hardened Steel  
High Tensile, Torque and  
Shear Strength**

**Climatek™ Coating is AC257  
Code Approved for use in  
Treated Lumber**

**For Interior or Exterior Use  
Excellent for Vinyl Siding Installation**

**Also Available in PHEINOX™  
305 Grade Stainless Steel**

GRK's Low Profile Cabinet™ screws are designed specifically for use in cabinet construction and installation. Manufactured in a #8 gauge (4mm) diameter for universal size convenience. Thin enough to prevent most material splitting, while providing sufficient strength to guarantee a secure installation. The washer head design presses flush against any material surface. Builders have discovered that short Cabinet™ screws can be used in vinyl siding installation, which makes this fastener ideal for both interior and exterior applications. The Cabinet™ screw can also be used for light duty framing applications where a smaller diameter shank is necessary, yet a need exists for drawing power delivered by the washer head. Available in lengths from 1-1/4" to 3-1/8".

**DRIVE WITH SPEED, QUALITY & CONFIDENCE**
