

WARNING

FAILURE TO COMPLY MAY RESULT IN INJURY OR DEATH

- Ladder or platform hoist must be level and stabilized
- ladder or platform hoist must first be at the proper angle-See Mfg Specifications.
- If this strap is worn or frayed, discard and DO NOT USE.
- Use one strap on each side of ladder or platform hoist.
- Nail or deck screw must hold 50 lbs and have a head size between 1/4" to 3/8".
- Nail or deck screw must have at least 1" of penetration into rafter with no more than a 1/4" of height above surface.
- Be sure to install so that straps are not a trip hazard or prevent proper platform hoist carriage movement.
- This is not a Fall Protection Device and not intended to prevent ladder from falling down.
- Consult Federal, State and local OSHA rules prior to use.
