

## FS Deck Mount Skylight Details and Quick Facts

Deck Mount Skylights are installed directly into a hole on the home's roof cut to the exact size of the skylight. Unlike curb mount skylights, deck mounts will have a more flush finish to the roof.

When looking at a deck mount skylight, please consider the following:

- Velux recommends the FS Skylight is installed on a roof with a pitch of 14° - 85°
- Opening in roof is constructed to exact size of skylight used
- Skylight and skylight curb is wrapped on Velux's adhesive skylight underlayment
- Skylight is properly secured to the opening and installed over flashing
- Proper clearance from valleys, ridges and slope changes. See below for specified clearance:
  - Shingle Roof: 18in. Top and Bottom, 12in. Left and Right
  - Tile Roof: : 24in. Top and Bottom, 12in. Left and Right
