Shipping Weight: 225 lbs.

Updated TranzVolt G2 Roofing Kits by Tie Down is an amazing improvement over the previous models. With an extended warranty of 2 years for the powerbox, the TranzVolt G2 system is designed to hold up to the demanding jobsite conditions. The TranzVolt G2 now utilizes AmSteel-Blue high-performance 12-strand single braid of 100% Dyneema® fiber cable. AmSteel Blue high-performance Dyneema fiber cable has extremely low stretch, superior flex fatigue, and wear resistance. The eco-friendly TranzVolt G2 eliminates the need for the messy and costly life cycle use of fuel and oil. The Roofing Kit carries material as high as 44 ft. at a rate of 2 ft. per second. The TranzVolt can reach the height of a two-story building in under 25 seconds. Using two standard DeWalt Brand 20V batteries or Milwaukee Brand 18V rechargeable batteries, the roofing Kit offers a full 8 hours while lifting up to 250 lbs. Lift material such as shingles, rolled goods, tools and bulk roofing materials. This product is a great tool for lifting material in tight spots or when low noise ordinances are being enforced.

\* Batteries (not included)
